FLAGGER LED

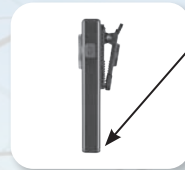

Smart signaling lamp

NEW!

- Stepless 150 - 500 Lumen
- 158 meter range
- 2,5 h usage in strongest mode
- Operate with gloves
- 109 g!
- Integrated hook & belt clip
- Smart placed magnets

Flagger LED is the improved iteration of a model launched in 2019. Two LEDs were used: a white LED with **stepless power adjustment from 150 to 500 lumens**, and a white COB LED reaching 200 lumens. The maximal **range of the beam is 158 meters**. Flagger is now even easier to use and can be operated with gloved hands. Both LEDs can be activated with a single button, easy to feel with your finger. The flashlight can be also hanged on the integrated hook or firmly attached to metal surfaces (rail/pole/car etc.) with **built-in magnets located in the back and in the base (see pictures above)**. Flagger is powered by a rechargeable battery, good for up to **2.5 hours in the highest power mode and even 7 hours if only the COB LED is used**. The kit includes a USB-C cable for recharging the flashlight.

White/Yellow/Red
Part no. 98315140

White/Green/Red
Part no. 98315130

Technical specifications:

Operating time: 7 hours
 500 lm - 2 h 30 min
 150 lm - 6 h
 White LED COB - 200 lm / 7 h
 Light output: 500 lm
 Light source: TG2 3535 LED + COB White LED
 Battery: Li-poly battery 3.7V 1500 mAh
 Charging time: 3 hours
 Beam distance: 158 m
 Weight: 109 g
 Dimensions: 107.5 x 47 x 36.5 mm
